ROMAN BARAKHVOSTOV (telegram: @rbarakhvostov)

Software Engineer | Frontend Developer | React Developer

https://www.linkedin.com/in/rbarakhvostov | https://github.com/rbarakhvostov | rbarakhvostov@gmail.com

Experienced **Senior Frontend Developer** with over **6 years** of hands-on experience in building high-quality user interfaces. Proficient in React, TypeScript, and JavaScript, with additional expertise in Next.js, Vue, and React Native. I actively leverage modern **AI Tools** (such as Claude Code, Cursor, GitHub Copilot, Kilo Code, DeepSeek, ChatGPT) to accelerate development workflows, improve code quality, and streamline debugging processes. Beyond development, I have extensive experience conducting technical interviews and participating in client and stakeholder presentations, effectively bridging the gap between technical implementation and business goals. I also have a strong background in mentoring and technical leadership, including active participation in the RS School program. I am ready to apply my technical stack and expertise to drive the growth of your company's products.

PROFESSIONAL EXPERIENCE

Alfa-Bank **2025 -**

https://www.alfabank.by

Software Engineer | React Frontend Developer | NextJS Developer

- Built a custom platform for bank operators that cut operational overhead by over **50%** and sped up client request processing by **60%**
- Delivered complex financial features with backend developers, UX/UI designers, BA, and QA, raising user satisfaction by **80%**
- Designed and iterated on application architecture with the team
- Led code reviews to enforce standards and keep delivery quality high
- Used AI-assisted tooling to speed up development and improve code quality (**50%** increase in productivity)

Senla **2021 - 2025**

https://senlainc.com

Software Engineer | React Frontend Developer

- Built operator-facing banking app and contributed to CRM development, reducing employee workload by more than **50%**
- Collaborated with backend developers, UX/UI designers, BA and QA to implement and integrate complex financial features, ensuring seamless functionality and a cohesive user interface for banking applications. This increased user satisfaction by **70%**
- Designed and discussed application architecture
- Wrote unit and integration tests
- Conducted code reviews to keep quality and coding standards consistent
- Mentored engineers and conducted technical interviews

GP Solutions (Leverice) **2020 - 2021**

https://gpsolutions.com | https://leverice.com

Software Engineer | Vue Frontend Developer

- Built the messaging platform UI, increasing engagement and satisfaction by **50%**
- Translated design mockups into functional and responsive front-end components, improving UX/UI by **60%**
- Delivered a consistent experience across desktop, tablet, and mobile
- Actively participated in Scrum ceremonies

EPAM **2020**

https://www.epam.com

Software Engineer | React Frontend Developer

- Built a React application used by more than **100** EPAM teachers
- Added Jest and Enzyme unit tests that reduced errors by **25%** and made the codebase easier to maintain
- Contributed to code reviews to keep quality high
- Worked closely with an agile team (Scrum, Kanban)
